Special bulletin

Preliminary information on formation of tropical cyclone over Arabian Sea

A low pressure area is likely to form over southeast Arabian Sea and adjoining Equatorial Indian ocean around 14th May 2021. It is likely to move north-northwestwards and intensify into a cyclonic storm around 16th May 2021 over Eastcentral Arabian sea. **Fishermen out in the deep sea areas of Arabian sea are advised to return to coast by 14th May.**

IMD is continuously monitoring the weather situation and updates would be sent as and when required.
