Sub: Special message regarding maximum temperatures over Tamilnadu, Puducherry & Karaikal

Maximum temperatures observed during the past 24 hours:

During the 24-hr ending 08:30 IST of today (30.04.2024), there was no large change in the maximum temperatures over Tamilnadu were generally **above normal to appreciably above normal 2 to 4°C** over many pockets in the plains of interior Tamilnadu. They were **normal to above normal (1-3°C)** over the coastal areas of Tamilnadu and near normal over Puducherry & Karaikal area.

Highest maximum temperature recorded at **Erode 42.6°C (+4.2°C)** followed by **Tirupattur: 42.0°C (+4.2°C)**, **Salem: 41.6°C (+3.9°C)**, **Vellore: 41.5°C (+2.7°C)**, **Karur Paramathi: 41.0°C (+3.9°C)**, **Dharmapuri: 40.5°C (+3.4°C)**, **Tiruchirappalli_AP: 40.3°C (+2.1°C)**, **Madurai_AP: 40.2°C (+2.5°C)**, **Tiruthani: 40.1°C (+1.2°C)**, **Madurai City: 40.0 (+2.8°C)**, **Thanjavur: 40.0°C**.

Plains of **the rest of** Interior Tamilnadu recorded **38-40°C**. The **coastal areas** of Tamilnadu, Puducherry & Karaikal recorded **35°C to 38°C** and the **hilly areas, 23°C to 31°C** temperatures.

Chennai recorded normal maximum (MBK: 37.9°C, +1.2°C and NBK: 36.2°C, +0.6°C).

Temperature & Humidity Forecast and warning for next five days:

Forecast <u>Day-1 to Day-5</u> <u>(30.04.2024 to</u> <u>04.05.2024)</u>	<u>Maximum Temperature:</u> <u>30.04.2024- 04.05.2024:</u> Maximum temperature is likely to rise gradually up to 2°C over Interior Tamilnadu during the next five days (30.04.2024 to 04.05.2024). <u>30.04.2024- 04.05.2024:</u> Maximum temperature is likely to be generally 3-4°C above normal over the interior Tamilnadu during the next five days (30.04.2024 to 04.05.2024) and above normal by 3-5°C above normal at a few pockets over North interior Tamilnadu during 01.05.2024 to 03.05.2024. It is likely to be 39-43°C at a few pockets over the plains of the North Interior districts, 38-40°C over the plains of the rest Tamilnadu and 36-39°C over coastal Tamilnadu, Puducherry and Karaikal area during the next five days. (30.04.2024 to 04.05.2024). <u>Relative Humidity (30.04.2024 - 04.05.2024):</u> Humidity is likely to be about 30-50% in the afternoon hours and 40-75% during the rest of the day over the plains of interior districts; and 50-80% over the coastal areas during the next four days (30.04.2024 to 04.05.2024).
<u>Warning Day-2 to</u> <u>Day-4</u> <u>(01.05.2024-</u> <u>03.05.2024)</u>	Heat wave conditions are likely to prevail at isolated pockets over North Interior Tamilnadu. Due to humid air & high temperatures, hot & discomfort weather is very likely to prevail at isolated pockets over rest of Tamilnadu, Puducherry and Karaikal area
Action suggested to the public	As given in the attachment

P.SENTHAMARAI KANNAN
SCIENTIST-F

for the Deputy Director General of Meteorology
Regional Meteorological Centre, Chennai

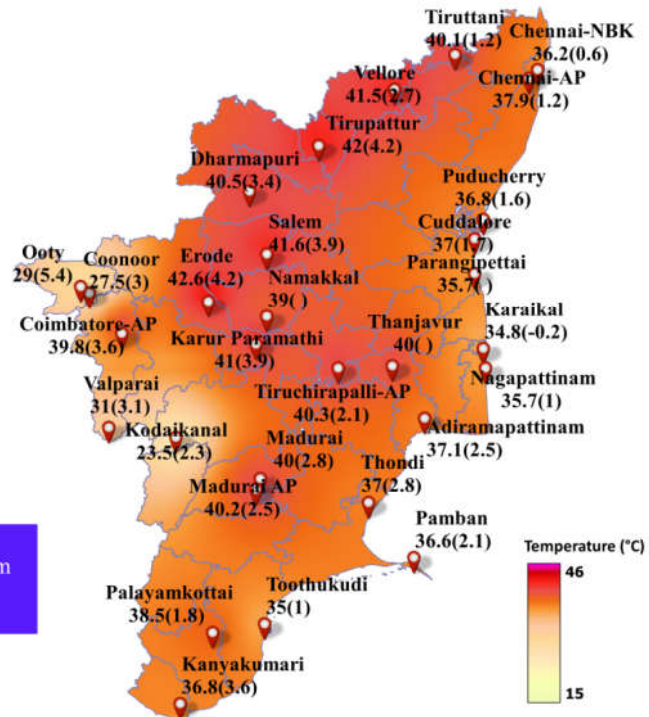

Realised Maximum Temperature ($^{\circ}\text{C}$) in the past 24 Hrs
(upto 0830 IST of 30/04/2024) and its departure from normal($^{\circ}\text{C}$)

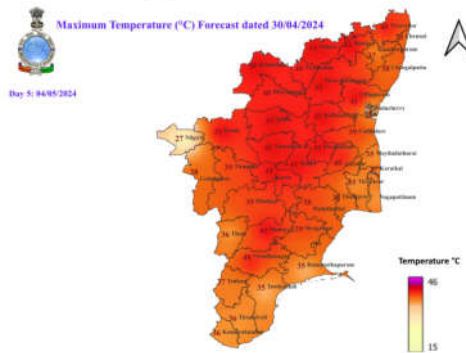

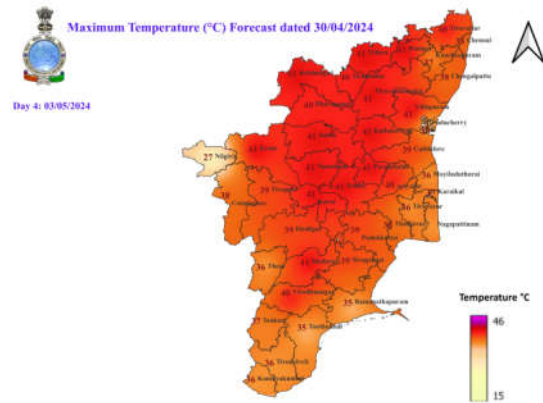

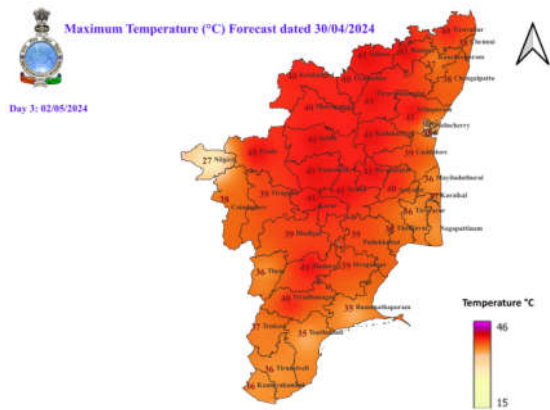

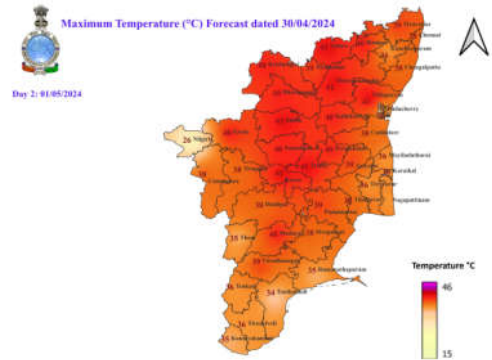

India Meteorological Department
Regional Meteorological Centre, Chennai
Date: 30/04/2024

The highest temperature recorded : 42.6°C
Place : Erode

N.B. The departure from normal maximum temperature is given in brackets.

ADVISE FOR MINIMISING IMPACTS DUE TO HEAT STRESS

(<https://ndma.gov.in/Natural-Hazards/Heat-Wave/Dos-Donts>)

- Avoid going out in the sun, especially between 12.00 noon and 3.00 p.m.
- Drink sufficient water and as often as possible, even if not thirsty
- Wear lightweight, light-coloured, loose and porous cotton clothes. Use protective goggles, umbrella/hat, shoes or chappals while going out in sun.
- Avoid strenuous activities when the outside temperature is high. Avoid working outside between 12 noon and 3 p.m.
- While travelling, carry water with you.
- If you work outside, use a hat or an umbrella and also use a damp cloth on your head, neck, face and limbs.
- Do not leave children or pets in parked vehicles.
- If you feel faint or ill, see a doctor immediately.
- Use ORS, homemade drinks like lassi, torani (rice water), lemon water, buttermilk, etc. which helps to re-hydrate the body.
- Keep animals in shade and give them plenty of water to drink.
- Keep your home cool, use curtains, shutters or sunshade and open windows at night.
- Use fans, damp clothing and take bath in cold water frequently.

TIPS FOR TREATMENT OF A PERSON AFFECTED BY A SUNSTROKE

- Lay the person in a cool place, under a shade. Wipe her/him with a wet cloth/wash the body frequently. Pour normal temperature water on the head. The main thing is to bring down the body temperature.
- Give the person ORS to drink or lemon sarbat/torani or whatever is useful to rehydrate the body.
- Take the person immediately to the nearest health centre. The patient needs immediate hospitalisation, as heat strokes could be fatal.

ACCLIMATISATION

People at risk are those who have come from a cooler climate to a hot climate. You may have such a person(s) visiting your family during the heat wave season. They should not move about in open field for a period of one week till the body is acclimatized to heat and should drink plenty of water. Acclimatization is achieved by gradual exposure to the hot environment during heat wave.
